

## B&W bike case

The latest generation "BIKE SAFE" will accommodate all frame sizes, including downhill frames. The aluminium anti-shock frame holds the bike frame very securely; it has adapters to cover almost all axle types. The bike case features four wheels, a fifth centre wheel to support heavier loads, handles in all sensible places, two padded wheel bags and numerous other usability and security embellishments.

### bike case dimensions

External	1280 x 890 x 345mm	Internal	1255 x 850 x 320mm	Weight	14.0kg
----------	--------------------	----------	--------------------	--------	--------

## B&W 2 wheel box

Transporting spare wheels in a hard case has got to make sense. This lockable wheel box holds two mountain bike wheels or three road wheels (with the divider removed). The wheels and pulling handle are designed for easy removal, e.g. to avoid damage in baggage handling systems.

### 2 wheel box dimensions

External	900 x 820 x 365mm	Internal	795 x 720 x 320mm	Weight	8.5kg
----------	-------------------	----------	-------------------	--------	-------

## B&W folding-bike bag

Ideal for protecting the car from oil and mud - it's made from PVC backed high density nylon - and for carrying your bike on the train. You may wish to provide extra padding for air travel, but at least you can stuff the empty bag in your rucksack and pedal away.

### folding-bike bag dimension

600 x 600 x 200mm

## B&W bike sack

Ideal for train use, or for carrying wet and muddy bikes in vehicles. There are two inside pockets for the wheels, and an adjustable shoulder strap. It is deliberately not padded, making it easier to fold up and to store.

### bike sack dimensions

1200 x 850 x 230mm Weight 2.15kg

## B&W xs.cases

Designed for digital cameras, smartphones, MP3s, keys etc. xs.cases are crushproof, dustproof and water resistant. Fix one to a bike using an optional Rixen & Kaul "Click Fix" adapter, keep one in a rucksack or on a belt. (The nylon strap and belt hook are detachable.)

## B&W bike box

The bike box should fit comfortably into an average estate car, with the rear seats up, and will accommodate frames to 62cm. Two padded wheel bags are included as well as e.g. fork distance keepers and foam padding for key components.

### bike box dimensions

External	1150 x 870 x 295mm	Internal	1080 x 780 x 250mm	Weight	9.9kg
----------	--------------------	----------	--------------------	--------	-------

## B&W folding-bike box

Designed for the Brompton range, but also ideal for most others. With its telescopic handle it also makes an excellent travel case in its own right.

### folding-bike box dimensions

External	700 x 640 x 330mm	Internal	625 x 610 x 240mm	Weight	8.25kg
----------	-------------------	----------	-------------------	--------	--------

## B&W bike bag

More than "half way between a bag and a full box" - it's more of a compromise on price than protection. It has most of the advantages of a box - the bike is held in an alloy anti-shock frame set in a 27cm high ABS plastic shell to protect the cranks, chain rings and rear mechs. The bag component is thickly padded with a three way lockable travel zip.

### bike bag dimensions

External	1270 x 890 x 255mm	Internal	1260 x 840 x 250mm	Weight	7.75kg
----------	--------------------	----------	--------------------	--------	--------

## B&W 1 and 2 wheel bag

These padded nylon bags are fully lined, with very high quality zips. Both of them have three inside pockets, one 230 x 170mm (Velcro), two 110 x 90mm (zipped). The double wheel bag has a stiffened divider to hold the two wheels apart.

### 1 and 2 wheel bag dimensions

Single 690 diameter by 50mm Double 690 diameter by 150mm

## B&W tool cases

We have a range of locking B&W tool cases to help our customers get better organised and to protect their tools. At the top end the B&W bike buddy includes a full set of Gedore and Parktool specialist bike tools.

**B&W**

**INTERNATIONAL**

## Make sure your bike is secure and protected when travelling

**B&W International** of Germany is a premier manufacturer of equipment cases for industry, and has been developing its range of bike cases for the last fifteen years. As supplier to several national teams, they've had plenty of feedback. There's no compromise on quality - their hard cases have robust inline skate wheels, reinforced axles, integrated tensioning belts and burst proof locks.

The B&W bike.cases range is distributed in the UK and Ireland by John Jordan Limited. Trade enquiries to 01539 751127 please. End user customers, please check [www.bike-cases.co.uk](http://www.bike-cases.co.uk) for stockists.
